PROFILE

AI & Data Science student with hands-on experience in Python, SQL, and machine learning, passionate about analyzing data, building predictive models, and solving real-world business problems through analytics and visualization.

EDUCATION

ST. Martins Engineering College, Hyderabad — **B.Tech in Artificial Intelligence & Data Science** (2023–2027)

Narayana Junior College, Hyderabad — **Intermediate in MPC** (2021–2023)

Newton Techno High School, Hyderabad — **SSC, Board of Secondary Education** (2021)

SKILLS

Technical: Python, SQL, Machine Learning, Deep learning, Exploratory Data Analysis (EDA), ETL, Statistical Data Analysis, Data Visualization, Data Cleaning & Transformation, Data Warehousing.

Soft Skills: Effective Cross-Functional Communication, Creative Problem Solving, Time Management, Adaptability.

Tools: Power BI, Pandas, NumPy, Scikit-learn, Streamlit, PostgreSQL, Matplotlib, Git , MS Excel.

Experience

Data Science Intern | Evoastra | June 2025 – August 2025

- Leveraged statistical analysis and machine learning to support data-driven business projects.
- Analyzed marketing campaign performance (CTR and ROI) using SQL and Power BI, providing actionable insights that informed strategy.
- Conducted sentiment analysis on customer feedback with Python, identifying key improvement areas to enhance customer experience.

PROJECTS

PPE Detection using Deep Learning

- Developed a YOLOv8-based object detection system trained on 2,800+ construction-site images to detect 10 classes, including hardhats, masks, safety vests, personnel, vehicles, and machinery.
- Trained and evaluated a custom YOLOv8 Nano model using validation metrics, confusion matrix, and precision-recall analysis for automated PPE compliance monitoring.
- Tech: Python, YOLOv8, Deep Learning, Computer Vision, Neural Networks, Kaggle.

SQL - Sales Analysis

- Analyzed 50,000+ sales records using optimized PostgreSQL queries, reducing query execution time by 25%.
- Conducted segmentation and cohort analysis, identifying 15% higher retention potential for targeted customer groups.
- Tech: PostgreSQL, DBeaver, PGadmin.

Movie Recommendation System

- Developed a content-based recommendation engine for 10,000+ movies, leveraging 20+ metadata attributes to achieve 80%+ similarity accuracy using cosine similarity and Scikit-learn.
- Demonstrated adaptability by iterating on user feedback to enhance recommendation accuracy.
- Tech: Python, Pandas, Scikit-learn, Streamlit. [Live Demo]
