PROFILE

AI & Data Science undergraduate aspiring to become a Data Analyst, with hands-on experience in SQL, Python, Excel, Power Bi, sales analysis, dashboard creation, forecasting, and customer data analytics.

EDUCATION

ST. Martins Engineering College, Hyderabad — **B.Tech in Artificial Intelligence & Data Science** (2023–2027)

Narayana Junior College, Hyderabad — **Intermediate in MPC** (2021–2023)

Newton Techno High School, Hyderabad — **SSC, Board of Secondary Education** (2021)

SKILLS

Technical: SQL, Python, Data Analysis, Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning & Transformation, Data Visualization, Customer Segmentation, Cohort Analysis, KPI Reporting, Forecasting.

Soft Skills: Effective Cross-Functional Communication, Analytical Thinking, Problem Solving, Attention to Detail, Time Management, Adaptability.

Tools: Power BI, MS Excel, PostgreSQL, Pandas, NumPy, Matplotlib, Seaborn, DAX, DBeaver, PGAdmin, Git.

Experience

Data Science Intern | Evoastra | June 2025 – August 2025

- Leveraged statistical analysis and machine learning to support data-driven business projects.
- Analyzed marketing campaign performance (CTR and ROI) using SQL and Power BI, providing actionable insights that informed strategy.
- Conducted sentiment analysis on customer feedback with Python, identifying key improvement areas to enhance customer experience.

PROJECTS

SQL - Sales Analysis

- Analyzed 50,000+ sales records using optimized PostgreSQL queries, reducing query execution time by 25%.
- Conducted segmentation and cohort analysis, identifying 15% higher retention potential for targeted customer groups.
- Tech: PostgreSQL, DBeaver, PGadmin.

Power BI - Data Jobs Analysis Dashboard

- Built an interactive Power BI dashboard for 479K global data-job postings, analyzing job demand, skill popularity, salary trends, and geographic distribution.
- Implemented DAX measures, Power Query transformations, KPI cards, slicers, and dynamic drill-through to enable role- and country-level analysis of salaries, skills, remote work, education, and job platforms.
- Tech: Power BI, DAX, Power Query, Data Modeling, Data Visualization.

Advanced Flight Delay Analysis using Python

- Conducted exploratory data analysis (EDA) on 336,776 NYC flight records to identify delay patterns across airports, airlines, time periods, seasons, and routes, uncovering key operational trends and reliability insights.
- Performed data cleaning, statistical hypothesis testing, correlation analysis, and interactive visualizations.
- Tech: Python, Pandas, NumPy, Plotly, SciPy, Jupyter Notebook.
